

# BOE MLED BFH COG Series

## Key Features

### Ultra-simplified structure, thinner and lighter

- Innovative ultra-simplified structure
- Weight reduced by 25%+ compared to traditional enclosures

### Higher Flatness

- The inherent properties of glass-based materials contribute to the product's high flatness.

### Better integration and more efficient assembly

- High refresh rate 7680hz, high contrast

### Higher Image Quality

## Application Scenarios

Commercial | Public screen | Data center | Exhibition | Conference

### BFH-COG

|                                     |                         |
|-------------------------------------|-------------------------|
| Pitch (mm)                          | 0.935                   |
| HDR                                 | Support                 |
| Cabinet Dimension(mm)               | 598.4x504.9             |
| Cabinet Flatness(mm)                | ≤0.09                   |
| White Balance Brightness (nit)      | Typ.600nit Peak.1000nit |
| 10 lux Ambient Light Contrast Ratio | 10000:1                 |
| Driving Mode                        | Glass-AM                |
